Reform and Development of China's Postal System

- formulating development strategies, plans, policies, and standards for the postal industry;
- carrying out postal regulatory functions;
- supervising market access for postal services, including express delivery services;
- supervising and inspecting confidential communications;
- regulating work safety of the postal industry;
- representing China in international postal organizations and handling intergovernmental postal affairs.

Regulation of Universal Postal Services and Express Delivery Services

Regulation of Universal Postal Services

01 improving regulations and systems

issued regulations, developed and revised the UPS standards, and provided guidance for the issuance of local postal regulations in multiple provinces to continuously enhance standardized governance.

02 strict administrative approvals

to ensure the balance of the total number of service outlets and the stability of the service level

03 strict supervision and inspection

supervising and inspecting postal enterprises for violations of laws and regulations and substandard service quality issues

04 service quality monitoring

commission third-party agencies to regularly monitor indicators

05 public supervision

hire over 3,000 specially invited public supervisors to oversee service quality and safety

邮政普遍服务监督 管理办法

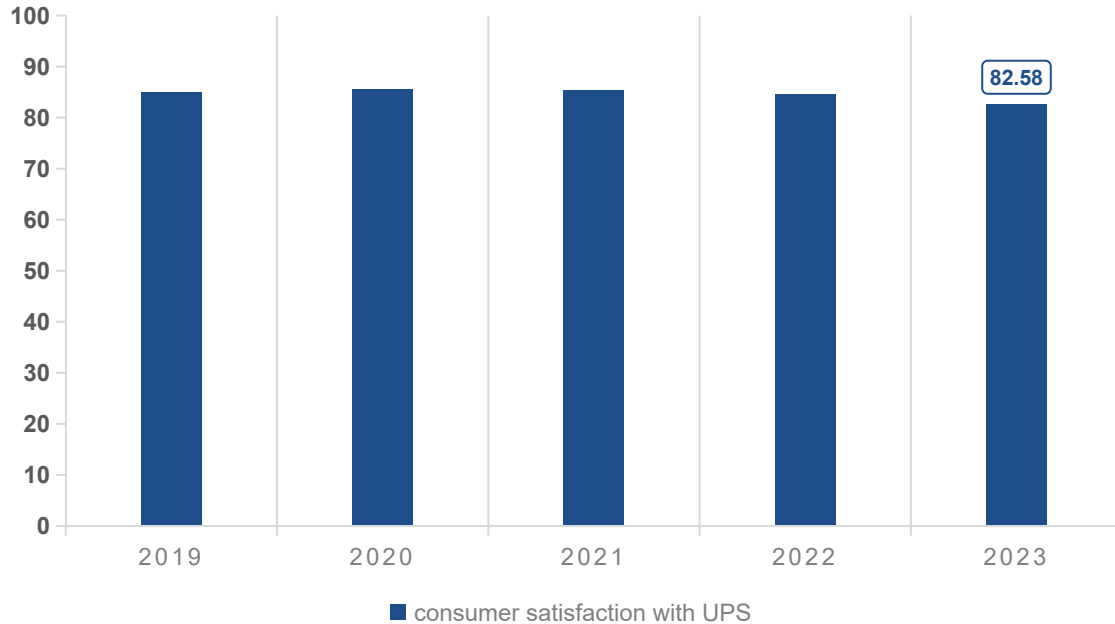

Regulation of Universal Postal Services

54,000 UPS business premises, 73% in rural areas

44,000 postal routes with a total one-way distance of 11,425,000 kilometers

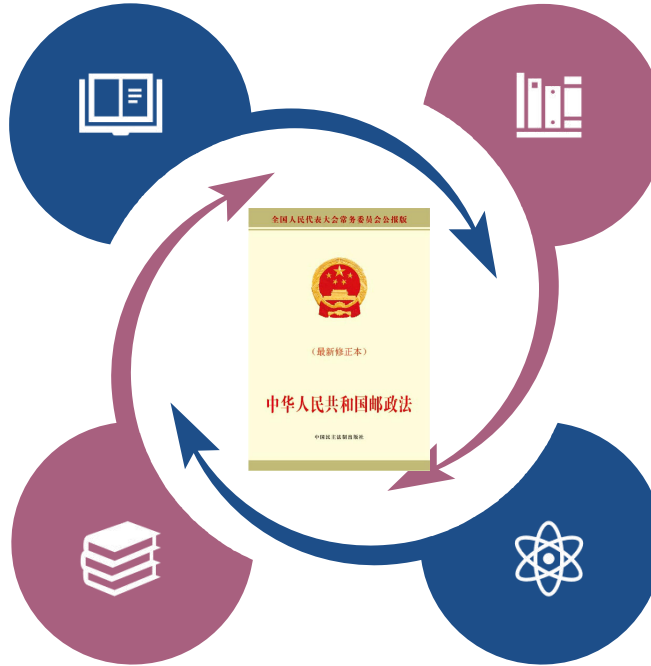

Regulation of Express Delivery Services

1 Improving the licensing management system

国家邮政局印制

3 Strengthening safety management

2 Strengthening "in-process and ex post" regulation

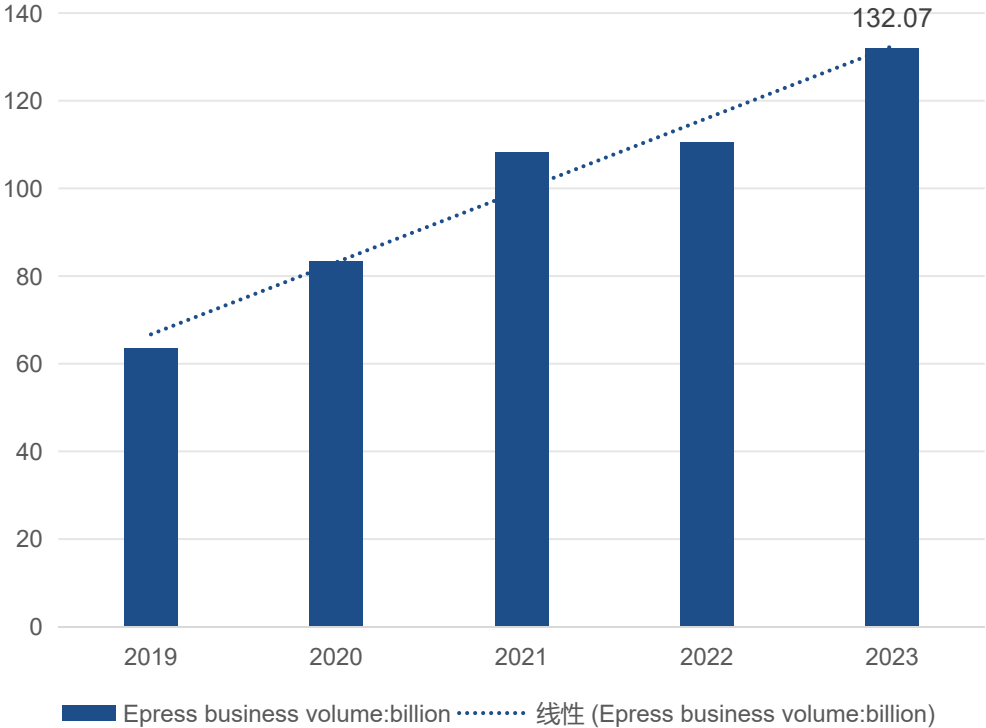

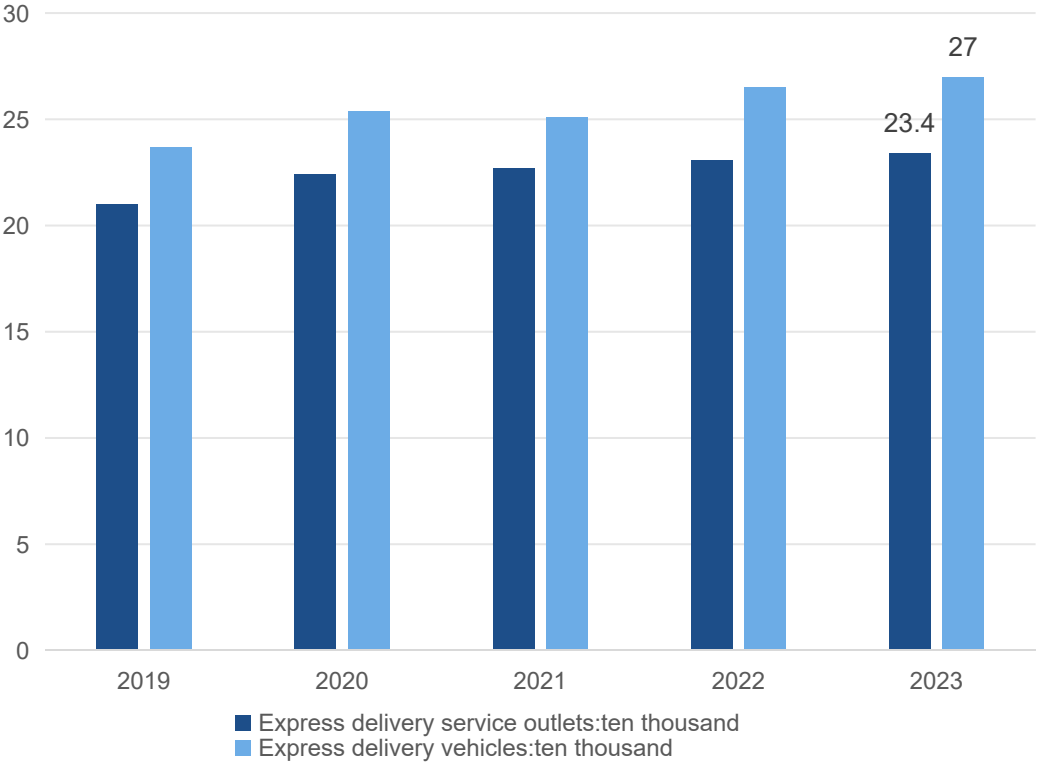

4 Improving the regulatory framework

Regulation of Express Delivery Services

Through such efforts, China's express delivery industry has achieved significant growth.

The maximum daily handling capacity exceeded 700 million items, and the annual per capita express delivery volume exceeded 90 items.

Sustainable Development of China's Postal Industry

Sustainable Development of China's Postal Industry

sustainable economic development

connected digital and real economies, promoted integrated urban-rural development, connected domestic and international markets, and effectively driven the logistics industry to reduce costs and increase efficiency

implemented green packaging projects
electrification of vehicles
green and low-carbon transformation of transportation modes and infrastructure

sustainable social development

implement the programs of “extending postal and express delivery services to towns and villages”, expanded the rural delivery service network
promote the construction of integrated rural delivery and logistics service stations (village post stations)

sustainable ecological development

THANK YOU
