Mr. Gary Carroll, Managing director of APP office, briefly presented the new VAT policy in the EU from 1st July and explained following points:

Implementation Date: From 1 July 2021 the VAT rules on cross-border business-to-consumer (B2C) e-commerce activities will change

VAT Policy: The VAT exemption at importation of small consignments of a value up to EUR 22 will be removed. All goods imported in the EU will now be subject to VAT.

Payment of VAT: 3 options including IOSS/OSS, special arrangements and collection upon delivery. Retailers need to collect the VAT tax from the buyer.

IOSS solution: The Import One Stop Shop (IOSS) - A new special scheme for distance sales of low value goods imported from third territories or third countries has been created to simplify the declaration and payment of VAT.

The role of DO/Courier: Postal operators and courier use IOSS VAT number registered by online sellers to declare goods upon importation to the customs authorities.

The responsibility of DO: DO must get informed and advise, and where possible offer solutions to our customers on how to adapt to the new process.
